Digital Mammography

Reviews

The most effective publication i at any time go through. This is certainly for all those who statte that there had not been a worthy of looking at. Its been printed in an extremely straightforward way which is merely soon after i finished reading this publication where basically changed me, change the way in my opinion.

Springer-Verlag GmbH Jul 2008, 2008. Taschenbuch. Book Condition: Neu. 23.5x15.5x cm. Neuware - This volume (5116) of Springer's Lecture Notes in Computer Science contains the proceedings of the 9th International Workshop on Digital Mammography (IWDM) which was held July 20 - 23, 2008 in Tucson, AZ in the USA. The IWDM meetings traditionally bring together a diverse set of researchers (physicists, mathematicians, computer scientists, engineers), clinicians (radiologists, surgeons) and representatives of industry, who are jointly committed to developing technologies to support clinicians in the early detection and subsequent patient management of breast cancer. The IWDM conference series was initiated at a 1993 meeting of the SPIE Medical Imaging Symposium in San Jose, CA, with subsequent meetings hosted every two years at sites around the world. Previous meetings were held in York, England; Chicago, IL USA; Nijmegen, Netherlands; Toronto, Canada; Bremen, Germany; Durham, NC USA and Manchester, UK. The 9th IWDM meeting was attended by a very international group of participants, and during the two and one-half days of scientific sessions there were 70 oral presentations, 34 posters and 3 keynote addresses. The three keynote speakers discussed some of the 'hot' topics in breast imaging today. Karen Lindfors spoke on 'Dedicated Breast CT: Initial Clinical Experiences.' Elizabeth Rafferty asked the question is 'Breast Tomosynthesis: Ready for Prime Time.' Finally, Martin Tornai discussed '3D Multi-Modality Molecular Breast Imaging. 769 pp. Englisch.'
